About

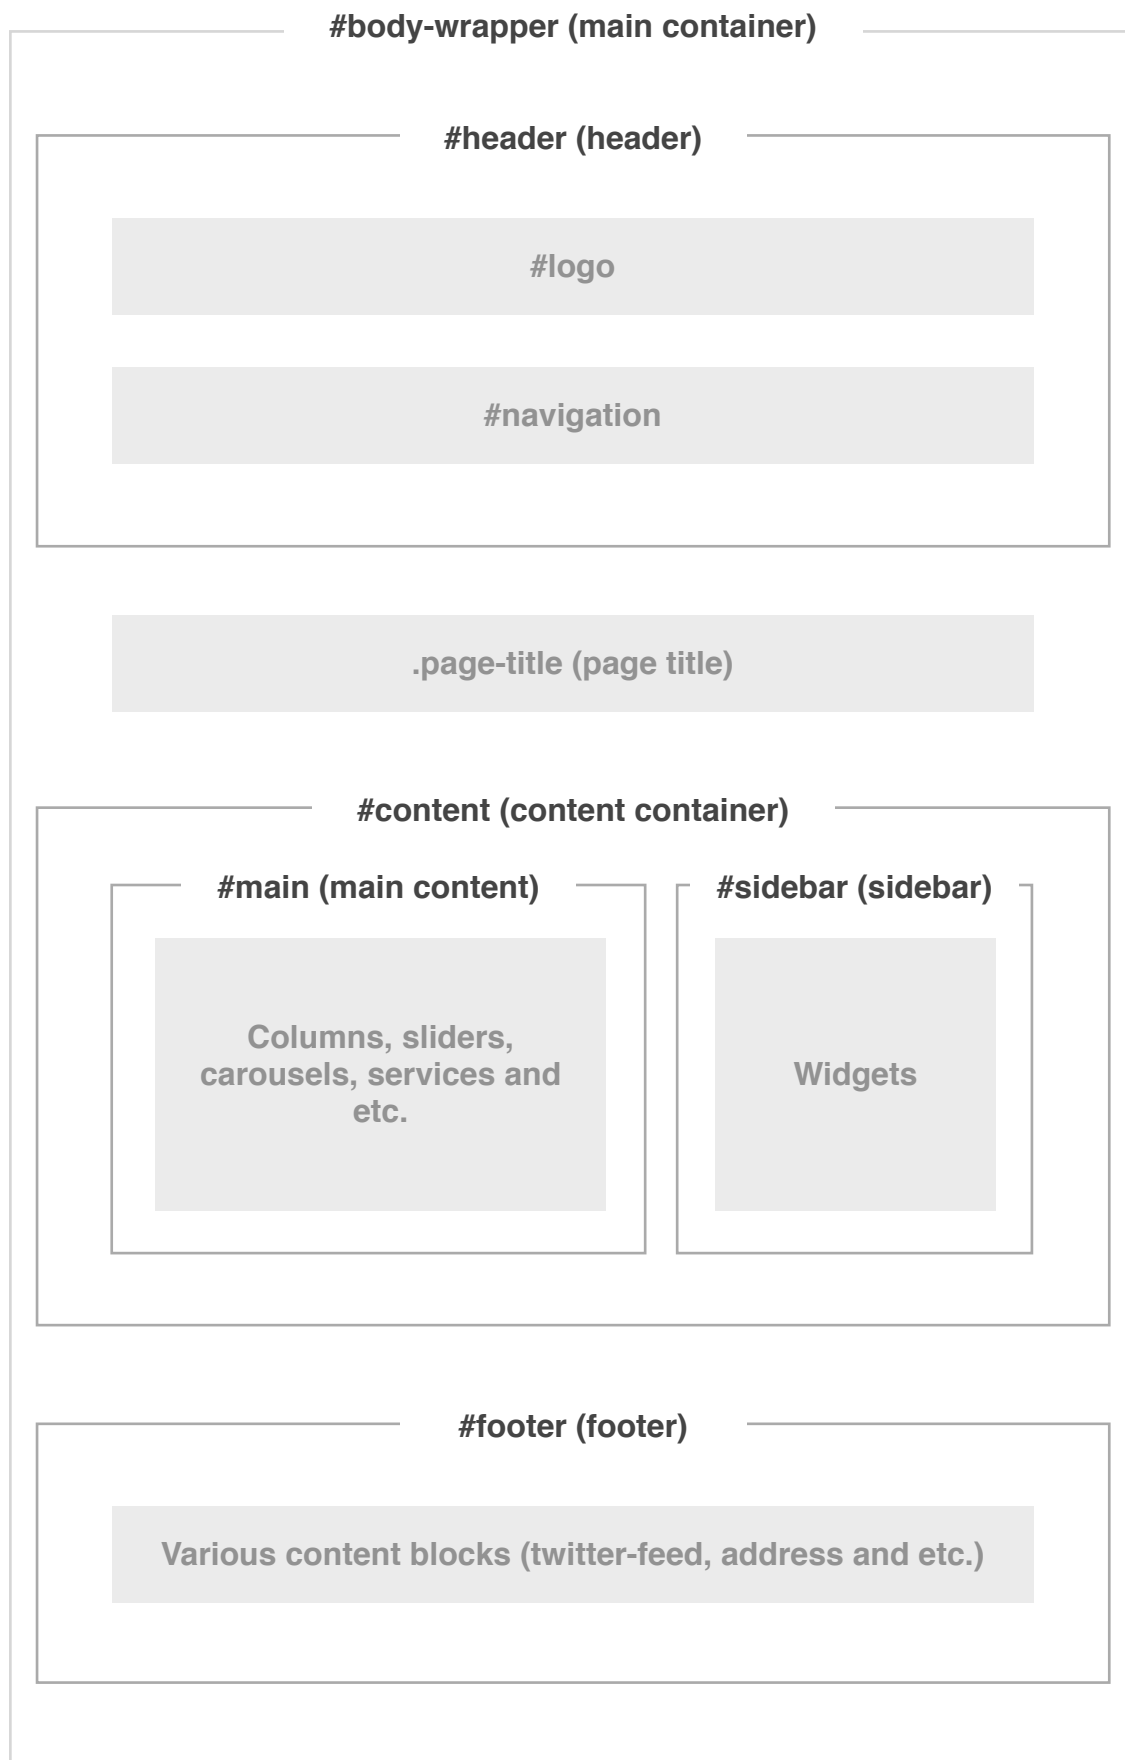

Revision is a responsive HTML5 / CSS3 template for business, software or blog site. This is a flexible and multipurpose, modern and sleek site template, suited for any situations. With a responsive design it is ready to look stunning on any device – from a widescreen monitor to a mobile phone.

HTML Files & Structure

This template consists of several html files, which have the following key sections:

Pages with the sidebar is a little different in the content section:

CSS Files

All CSS files which is used to style the layout and content are located in **css** folder:

- boxed.css (Styles for Boxed version)
- wide.css (Styles for Wide version)
- fancybox.css (Fancybox core CSS file)
- flexslider.css (FlexSlider core CSS file)
- font-awesome.css (Iconic Font Awesome core CSS file)
- zocial.css (Iconic Font Zocial core CSS file)
- responsive.css (Media Queries)
- revslider.css (Slider Revolution core CSS file)
- style.css (main CSS file, included reset styles)

Additional CSS files with color schemes:

- color-blue.css
- color-cream.css
- color-darkgray.css
- color-green.css
- color-lightgray.css
- color-orange.css
- color-pink.css
- color-red.css
- color-tan.css
- color-yellow.css (main color scheme)

Javascript Files

All Javascript files are located in **js** folder. By default theme uses minified version of the all scripts to reduce page loading times and to save your site bandwidth.

custom.js

All Javascript settings & custom scripts.

jquery-1.8.2.min.js, jquery.ui.accordion.min.js, jquery.ui.tabs.min.js, jquery.ui.widget.min.js

jQuery is a fast and concise JavaScript Library that simplifies HTML document traversing, event handling, animating, and Ajax interactions for rapid web development. More information can be found at <http://jquery.com/>

jquery.easing-1.3.min.js

A jQuery plugin from GSGD to give advanced easing options. More information can be found at <http://gsgd.co.uk/sandbox/jquery/easing/>

jquery.fancybox.pack.js

Fancybox is a tool that offers a nice and elegant way to add zooming functionality for images, html content and multi-media on your webpages. More information can be found at <http://fancyapps.com/fancybox/>

jquery.fitvid.js

A lightweight, easy-to-use jQuery plugin for fluid width video embeds. More information can be found at <http://fitvidsjs.com>

jquery.flexslider-min.js

An awesome, fully responsive jQuery slider plugin. More information can be found at <http://www.woothemes.com/flexslider/>

jquery.imagesloaded.min.js

A jQuery plugin that triggers a callback after all the selected/child images have been loaded. Because you can't do .load() on cached images. More information can be found at <https://github.com/desandro/imagesloaded>

jquery.infinitemscroll.min.js

Infinite scroll has been called autopagerize, unpaginate, endless pages. More information can be found at <http://www.infinite-scroll.com>

jquery.isotope.min.js

Isotope: An exquisite jQuery plugin for magical layouts. More information can be found at <http://isotope.metafizzy.co/index.html>

jquery.jcarousel.min.js

jCarousel is a jQuery plugin for controlling a list of items in horizontal or vertical order. More information can be found at <http://sorgalla.com/jcarousel/>

jquery.jtweetsanywhere-1.3.1.min.js

jTweetsAnywhere is a jQuery Twitter Widget that simplifies the integration of Twitter services into your site. More information can be found at <http://thomasbillenstein.com/jTweetsAnywhere/>

jquery.themepunch.plugins.min.js, jquery.themepunch.revolution.min.js

Turn simple HTML markup into a responsive(mobile friendly) or fullwidth slider with must-see-effects and meanwhile keep or build your SEO optimization. More information can be found at <http://codecanyon.net/item/slider-revolution-responsive-jquery-plugin/2580848>

jquery.touchSwipe.min.js

A jquery plugin to be used on touch devices such as iPad, iPhone, android etc. More information can be found at <https://github.com/mattbryson/TouchSwipe-Jquery-Plugin>

jquery.validate.min.js

This jQuery plugin makes simple clientside form validation trivial, while offering lots of option for customisation. More information can be found at <http://bassistance.de/jquery-plugins/jquery-plugin-validation/>

jquery.zflickrfeed.min.js

This plugin will read Flickr photo feeds for a user and/or a list of tags. It produces structured HTML with in-built CSS classes for styling. More information can be found at <http://www.zazar.net/developers/jquery/zflickrfeed/>

respond.min.js

A fast & lightweight polyfill for min/max-width CSS3 Media Queries (for IE 6-8, and more). More information can be found at <https://github.com/scottjehl/Respond>

selectnav.min.js

JavaScript plugin that lets you convert your website navigation into a select drop-down menu. More information can be found at <https://github.com/lukaszfiszer/selectnav.js>

Photoshop Files

All .psd files are located in **PSD** folder:

- 01_homepage.psd
- 02_blog.psd
- 03_blog_post.psd
- 04_portfolio.psd
- 05_portfolio_details.psd
- 06_portfolio_details_v2.psd
- 07_contact.psd

All PSDs included contain the necessary styling for all elements including layouts, icons and has excellent structure.

The final version of the html template may differ slightly from PSDs included.

Setting up Color Scheme

To set up the color sheme you need to change the css file name in the HTML header section (in this line: `<link rel="stylesheet" href="css/colors/color-yellow.css" media="screen" />`). For example, color-yellow.css to color-cream.css.

For using this template without the “Style Selector” just remove from HTML files “Styles Selector” sections in top & bottom areas of files.

Setting up Layout Style

To set up the layout style you need to change the css file name in the HTML header section (in this line: `<link rel="stylesheet" href="css/boxed.css" media="screen" />`). For example, boxed.css to wide.css or vice versa.

For using this template without the “Style Selector” just remove from HTML files “Styles Selector” sections in top & bottom areas of files.

Setting up PHP Contact Form

This template contains a one PHP file (located in **php** folder) which is required to send a message using the contact form. This is a really accessible and well validated contact form by Joe Pettersson.

Setting up the contact form is really simple. All you need to do is to open php/contact.php file and replace `$emailTo` value with your own one.

More information can be found at <http://www.joepettersson.com/accessible-php-and-jquery-contact-form/>

Setting up Google maps

Here's what you need to do:

1. Open "custom.js" file (located in **js** folder)
2. Find the following line:

```
var $latlng = new google.maps.LatLng(34.021453, -118.785027),
```
3. Here you need to change the latitude and longitude values (values in parentheses).

This values you can find in the Google maps:

1. Open the Google maps
2. Find your area
3. Right click on the map and choose "That's here?" and you will see this values in the box above.

Setting up Twitter Feed

1. Open "custom.js" file (located in **js** folder)
2. Find the "Twitter Feed" section
3. Change the "username"

Here you can also change other settings for the Twitter Feed. More information can be found at <http://thomasbillenstein.com/jTweetsAnywhere/>

Setting up Flickr Feed

1. Open "custom.js" file (located in **js** folder)
2. Find the "Flickr Feed" section
3. Change the user ID 85381447@N08 to any other

Here you can also change other settings for the Flickr Feed. More information can be found at <http://www.zazar.net/developers/jquery/zflickrfeed/>
